SKILLS

Coding languages: Flutter, Dart, C++, C#, Java, Python, PHP, HTML, CSS, JavaScript, React, TypeScript, AJAX, .NET, ASP.NET, **Tools:** Microsoft Office, Visual Studio 2019, Visual Studio Code, DEV C++, Matlab, Linux, VMware WorkStation, Unity, Git, MVC Framework, GitHub, NetBeans, SQL Server, SSMS, MySQL Workbench, Teams, Android Studio

PROFESSIONAL EXPERIENCE

Yaşar bilgi işlem, Intern

07/2023 – 08/2023 | İzmir, Turkey

I made chat app with flutter and dart. I developed for android and ios. The project uses firebase database.

Fark Bilgi İşlem, Intern

01/2024 – 06/2024 | Ankara, Turkey

The company allows its customers to see what endorsement they have made and makes it happen it with data visualization. We used Flutter and dart language. We got datas from database with REST API(ASP.NET Core, onion file architecture). With file architecture I learned from previous internship, I dealt with easier.

Ostim Technical University IT Department, Part-Time Position

01/2024 – 03/2024 | Ankara

Executed the installation of Linux on my personal computer utilizing the Manjaro Plasma distribution. Installed the Odoo web server on the Virtual Machine Manager. Configured and set up the Proxmox Mail Gateway as a front-end filter for the Odoo mail server, ensuring optimal configuration for operational efficiency.

Pi Health, Intern

02/2023 – 03/2023 | Ankara, Turkey

I used Flutter and Dart to create an advertisement app about our company's policies and works for Android. I also designed their websites.

ARCA Teknoloji, Intern

02/2022 – 03/2022 | Ankara, Turkey

I used ASP.net Core and MVC Framework. I made a shopping site project.

PROJECTS

Graduation Project - Mobile Education Support System, Flutter, PHP, MySQL, .Net Rest API 📄

The project aims to digitalize traditional teaching methods and providing an accessible and engaging educational experience.

Bubble Chat App, Flutter, Firebase 📄

Used Firebase as a database, dart as a language and flutter framework. It combines chatting and location information. The aim is to be in constant communication.

GiroDashboard, Flutter, .Net Rest API, MsSQL

This project allows customers to see the endorsements they have made and visualizes the data. The technologies are .Net API and Flutter.

You can observe all my projects in github 📄
